

donkey sanctuary  
with a mission

In 2009, when we built the Godavari Donkey Sanctuary to home rescued sick and handicapped and working equines, we could not have dreamed that three years down the line we would be planning for a new sanctuary.

However, after rescuing and rehabilitating over 50 equines, we realize that we need more space and more visitors.

*'The Sanctuary'* will be a place where animals are treated with kindness and compassion and where visitors can learn about animal welfare and about the abuse that takes place against equines in Nepal. We hope to have the place up and running by the middle of next year.

We have leased a larger piece of land just below Godavari, famous for its flora and fauna. Godavari is home to almost 300 bird species, over 80 types of butterflies and 150 species of jungle orchids.

The new sanctuary provides a holistic package to visitors including camping, dining, hiking and biking, adventure activities and exposure to donkey and animal farm.

The slogan of the project will be "Eat-Play-Love". We envision a place where families will enjoy good food, interact with donkeys and farm animals and learn to love and respect animals. The Sanctuary will generate income to support our outreach programmes.

help us make a dream  
come true!
